

Display and operating unit with 5.7" display

Part-No. FX808324

Operating front including mounting frame and housing lock for display and operation of a fire alarm panel or a fire alarm system. HMI (Human Machine Interface) with capacitive keys and hidden-until-lit status indicators for intuitive operation during status changes. Operator password via access codes for all levels, with menu navigation display in different operation levels.

Features:

- Capacitive keyboard for touch sensitive operation
- Program-controlled night design with interactive keyboard menu
- Four access levels via access codes (details can be found in technical manual)
- Four freely programmable function keys on each access level with operating macros for supplementary functions
- 1/4 VGA (5.7-Inch) monochrome display

Operating voltage	24 V DC
Quiescent current	approx. 156 mA
Ambient temperature	-5 °C ... 45 °C
Air humidity	< 95 % (non-condensing)
Color	black, similar to RAL9005
Weight	approx. 1 kg
Dimensions	W: 450 mm H: 320 mm D: 30 mm

Please note:

The operating unit will include all country-specific slide-in labels.

To save valuable resources, in the future installation and operating instructions will be included in different languages on a USB storage device and only a paper short operating instruction and the logbook will still be included.

Built into front frame including housing lock, hinge unit and mounting material.
